

The Posterity Institute **Driving Inclusive Growth & Intergenerational Wellbeing**

A Future Built on Sustainability, Innovation, and Collaboration

At **The Posterity Institute (PI)**, we are shaping a new model for **inclusive, sustainable prosperity** in growth markets.

Our mission is simple yet urgent: **to ensure that economic growth, technological progress, and sustainability go hand in hand.**

We believe the future will not be built **for** our region—it must be built **by** our region, with **locally-driven solutions, strategic partnerships, and future-ready policies.**

The Middle East and Africa are at a crossroads, facing both **unprecedented challenges and once-in-a-generation opportunities.** Our role is to help **navigate this transition** by equipping **governments, businesses, and the philanthropic sector** with the tools to drive **sustainable and scalable impact.**

Why We Exist

Traditional development approaches **have not kept pace with the speed of change.** New global realities—**climate adaptation, technological disruption, demographic shifts, and economic volatility**—demand a more **integrated, forward-thinking** approach to problem-solving.

At The Posterity Institute, we focus on:

- **Unlocking the power of public-private-philanthropic collaboration** to solve systemic challenges.
- **Developing regionally-driven, high-impact strategies** tailored to local realities.
- **Leveraging technology for good**, ensuring AI, digital transformation, and sustainability go hand in hand.
- **Equipping decision-makers with knowledge, tools, and networks** to implement change—not just talk about it.

Sustainability, for us, is **more than an environmental issue**—it's about **economic resilience, social inclusion, and technological advancement.**

How We Create Impact

We operate through two distinct yet complementary strategic platforms:

CSO Network: The Region's Sustainability Leadership Hub

The **CSO Network** is a first-of-its-kind action-oriented community for **Chief Sustainability Officers (CSOs) and industry leaders**. This platform is designed to move beyond theory and **translate sustainability commitments into real-world impact**.

Through **expert dialogues, policy influence, and inter-sectoral collaboration**, we:

- Facilitate **roundtables, peer learning sessions, and strategy workshops** that accelerate the adoption of best practices and shape future policy.
- Mobilize **cross-industry resources and partnerships** to drive systemic change.
- Enable **leaders to co-design and pilot regionally relevant sustainability initiatives** that address social, environmental, and economic challenges.

This is **not just a network—it's a movement** for sustainability with a **Big S**, integrating environmental, economic, and social dimensions.

Irth Institute: Building Government Capacity for Sustainable Governance

Government policies and leadership play a **critical role** in ensuring sustainability is embedded in **national development strategies**. Yet, many decision-makers **lack the tools, training, and access to real-world solutions** needed to drive change.

That's where **Irth Institute** comes in.

As the **first dedicated digital campus for sustainability in the Middle East and Africa**, Irth empowers governments through:

- **Intergovernmental collaboration**—facilitating cross-border knowledge-sharing on sustainability strategies.
- **Policy innovation and research**—developing actionable insights to inform sustainable governance.
- **A digital learning platform**—providing policymakers and public sector leaders with **future-ready skills**.
- **Strategic fellowships and partnerships**—ensuring continuous learning and exposure to **cutting-edge global solutions**.
-

By merging **policy, technology, and sustainability**, Irth ensures that **governments are not just responding to change but leading it**.

The Future We Are Building

We don't just talk about sustainability—we make it **actionable, measurable, and scalable**. Our approach is not about **short-term fixes** but about **building the future of growth in a way that is inclusive, resilient, and sustainable**.

For us, this means:

- **Embedding sustainability in the DNA of businesses, governments, and institutions.**
- **Harnessing technology to solve the region's biggest challenges.**
- **Creating the right connections and knowledge ecosystems to drive systemic change.**
- **Ensuring that progress today doesn't come at the cost of future generations.**

Join Us

The Posterity Institute is a **catalyst for action, innovation, and impact**. We are **building the future now**—with the **right people, the right ideas, and the right tools** to drive lasting prosperity.

Join us in shaping a future that is sustainable, inclusive, and driven by innovation.
